Volcan Chico is also an active volcano, sulfur vents can be seen in this area. This is an approximately 6 hour's walk tour to appreciate all the splendor of the volcanoes. For those who do not wish to do the hike an alternative activity is visiting the Tuneles: a 30 to 40 minute ride on a small fast boat will take us to this unique place where lava flow has been impacted for many years by the oceans waves. This visiting site is a marine paradise for white tipped reef sharks, Galápagos green sea turtle, the Galápagos sea lions, manta rays, parrot fish, yellow tail surgeon fish among many others. Different species of animals can be seen in the area as sea lions, marine iguanas and penguins. This is a perfect place to practice snorkeling. Return to the hotel by lunch time. DAY 9

Transfer from hotel to Quito airport. Embark on a 30-minute flight and arrive at Puerto Francisco de Orellana, locally known as Coca, where you will be met by naturalist guide and will board a larger motorized canoe for 2 hours ride down the Rio Napo to Sacha Lodge.

Upon arrival to Sacha Lodge's private reserve, guests will take their first walk along a raised boardwalk through dense flooded palm forest where several species of monkeys are often sighted. Dugout canoes await to carry you across the Pilchicocha lake to the Lodge. You will arrive with time to settle in, bird-watch, swim, or take a walk under the canopy before dinner.

DAY 10 and 11

Activities are spread out over a wide area and allow visitors to explore several distinct but equally fascinating habitats. Visit to our on-the-premises butterfly farm is not to be missed.

One of Sacha Lodge's highlights is our Canopy Walk. It is one of only a few rigid, self-standing suspension canopy walkways in the world. Two of the three towers have observation platforms every 12 meters, making the towers accessible for everyone. The 275 meters, (900 feet) long canopy walkway is suspended at 36 meters (120 feet) above the forest floor.

Our newest attraction, the Treetop Walk, allows us to explore the rich life of the rainforest understory. We have built 5 observation platforms around tree trunks under the canopy, at heights between 20 and 65 feet, all connected by bridges. The Treetop Walk leads us on a 240 feet long path through this rainforest layer so rarely observed by human beings before.

A favorite activity of our guests is to paddle dugout canoes along tannin-rich black-water creeks and lakes, where luxuriant lianas, bromeliads and palm trees thrive. There is also a 43 meter (135 feet) observation tower that allows guests to climb into and above the rainforest canopy for a magnificent view of the surrounding area.

Located ten minutes across de Napo River, the Nueva Providencia Interpretation Center, an offers our guests the opportunity to share with the women from the community and learn about the Kichwa lifestyle. The visit culminates with a tasting of the local cuisine!

For adventurous souls, the day does not necessarily end with dinner. Night walks and canoe trips, with the aid of flashlights, often reveal creatures such as caimans that are seldom seen during daylight.
